EXAMINER'S AMENDMENT

TO: Erickson et al.

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James Fox on 4/4/2006.

The application has been amended as follows:

In claim 20, line 1, the term "antibody fragment" is deleted and the term "antigen binding fragment of said antibody" inserted therefor.

In claim 21, line 1, the term "antibody" is deleted and the term "antigen binding" inserted therefor.

In claim 35, line 2, the term "(ATCC HB-12697)" is added after the first word "2C4" and before the word "or".

2. The following is an examiner's statement of reasons for allowance: All previous rejections are withdrawn because the combination of the references fails to suggest treating a specific population (overexpress ErbB2 receptor but does not respond to treatment with anti-ErbB2 antibody) with a specific conjugate of an anti-ErbB2 antibody and maytansinoid. One skilled in the art would not have had a reasonable expectation of success to treat the patients who do not response to anti-ErbB2 antibody with a

conjugate of anti-ErbB2 antibody and maytansinoid. The method of making the humanized antibodies recited in claim 18 has been taught in US Patent No. 5,821,337 (see Example 1 and Table 3).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
